### MU-Source:

I: According to DIN ISO 11352 as expanded, combined measurement uncertainty with k = 2 (95 %), sampling not included

Certificate of analysis : 25037416 - 002

Sample name : Garcinia cambogia - GymBeam 90 caps

Decision rules:

y: In conformity assessment, measurement uncertainty is disregarded for measured values below the tolerance limit. For measured values exceeding the tolerance limit, measurement uncertainty is subtracted from the measured value. If no conformity assessment is performed, measurement uncertainty serves as informational data only.

m: The conformity assessment of microbiological measured values is performed without considering additional analytical measurands.
